PROFESSIONAL SUMMARY

AI Product and Technology Consultant with **4+ years** of experience across **consulting, AI, data science, and digital product development in India and the UK**. Experienced in translating business requirements into product features by writing user stories, defining acceptance criteria, collaborating with cross-functional teams, and delivering **AI-powered digital products using Agile methodologies**. Strong foundation in **GenAI, LLMs, RAG, Python, and SQL**, combined with hands-on experience in stakeholder management, product discovery, and **AI solution design**. Passionate about building AI-first products that solve real business and customer problems.

CORE COMPETENCIES

AI Product Design & Orchestration	Driving Ideation to Launch	Scrum · Kanban · Agile Delivery
LLM Agents · RAG · Multi-Agent AI	User Data Analysis & Feedback Loops	PRD · BRD · Tech Req. Docs
Feature Prioritisation (MoSCoW/RICE)	Cross-Functional Collaboration	OKR & KPI Definition & Tracking
Competitive Analysis & AI Trends	User Research & Usability Feedback	Stakeholder Alignment & Roadmapping
Product Intuition & UX Sensibility	Data-Driven Decision Making	Sprint Planning & Backlog Grooming
Python · SQL · Data Analysis	Figma · Miro · Wireframing	Business & Operations Acumen

PROFESSIONAL EXPERIENCE

Associate Tech Consultant · **Ernst and Young LLP** · Bengaluru

May 2026 – Present

Part of Big 4 consulting Firms — Member of Product team in service line - Digital Transformation and emerging Technologies.

- Contribute to the delivery of **AI-powered consumer mobile application** for a telecom client, supporting product definition across authentication, **AI assistant, profile, rewards, payments, chat, search, and notifications**.
- Write **user stories, acceptance criteria, and process flows**, collaborating with the Product Manager during backlog refinement and **Agile ceremonies**.
- Participate in **client workshops and cross-functional design** discussions to translate business requirements into scalable product features.
- Support the design of an **AI-powered customer support and FAQ assistant**, working closely with business, **design, and engineering teams** to deliver user-centric experiences.

AI Product Manager · **Lexsis AI** · Bengaluru

Jan 2026 – Present

Early-stage AI product company — sole PM owning product strategy, roadmap, and cross-functional execution end to end.

- Drove **ideation to launch** across all product features — writing PRDs, defining user stories and acceptance criteria, facilitating sprint planning, standups, and retrospectives with engineering and design teams.
- Analysed **user data, engagement metrics, and feedback sessions** to identify friction points and inform product prioritisation; tracked OKRs and KPIs to measure feature impact post-launch.
- Conducted **competitive analysis of AI product landscape** to identify market gaps, shape product vision, and differentiate against comparable tools — staying current on emerging AI capabilities and trends.
- Collaborated closely with **engineering, analytics, design, and operations teams** to define requirements, set priorities, align on roadmap, and ensure timely, quality delivery of product initiatives.
- Produced **investor pitch decks, market positioning narratives, and go-to-market plans**; led pilot client pitch meetings to close early adopters.

Co-Founder & Technical Product Manager · **Webfixus LLP** · Bengaluru

Sep 2025 – Mar 2026

Boutique studio managing 5+ concurrent AI consulting and digital product programs.

- Led **end-to-end product execution** across 3 client AI engagements and 6 institutional web redesign projects — discovery, scoping, sprint planning, release management, and post-launch iteration.

- Managed **cross-functional delivery** across developers, designers, photographers, editors, and vendors simultaneously — ensuring milestone accountability and quality output.
- Launched Reguru.in ecommerce platform (Shopify): defined product catalog, integrated Razorpay payment gateway, **tracked checkout conversion and drop-off metrics**, and iterated UX based on user data.

AI Product Manager & Consultant · **Healthtech Startup** · Bengaluru

Jan 2026 – Present

Designed and shipped AI product modules for an iOS/Android health and nutrition application.

- Shipped **1 AI module to production** (recipe generator agent); 3 further modules in active development — coordinating backend and mobile (iOS/Android) teams via Linear across all workstreams.
- Designed AI agent handling **37 real-world edge cases** — ingredient compatibility, dietary restriction conflicts, substitution logic, portion scaling, and regional food variations across 30+ Indian states — demonstrating deep AI orchestration thinking.
- Architected **human-in-the-loop approval workflow** enabling dietitians to review and override AI recommendations — balancing automation, user trust, and clinical compliance.
- Authored **PRDs, technical requirement docs, user flow diagrams, and acceptance criteria**; conducted user feedback sessions with dietitian stakeholders to validate and prioritise features.

AI Product Consultant · **Nirmaan** · Bengaluru

Jan 2026 – Present

- Architected complete AI product system from zero: **RAG curriculum assistant, hyper-personalised learning engine, AI whiteboard, tutoring agents, and voice interactions (ASR/STT)**.
- Defined **AI evaluation framework and observability plan** to measure learning effectiveness and agent performance; used Miro for stakeholder workshops and flow design.
- Authored full suite: **PRDs, BRDs, technical requirement docs, system architecture diagrams, and user flow diagrams** — stack: CrewAI, LangChain.

AI Solutions Consultant · **Pingmedia** · Remote

Sep 2025 (Project)

- Designed and delivered a **12-agent AI orchestration system** (CrewAI + LangChain): course recommender, career advisor, eligibility evaluator, and course comparison agents — demonstrating practical AI orchestration capability.

AI/ML Mentor & Product Contributor · **Syncner** · Remote

Feb 2025 – Aug 2025

- Designed **complete AI/ML learning curriculum**; mentored 20+ learners; designed 13 end-to-end case study projects for 3–5 student teams using Asana for program management.
- Built **AI-assisted resume builder and interview prep platform** using CrewAI and LangChain — shipped to active learner use.

Industrial Data Scientist · **AJET Pvt. Ltd** · Bengaluru

May 2024 – Jan 2025

- Built **predictive maintenance and failure forecasting models** for fleet operations; managed delivery in Scrum using Jira; developed Django dashboards for KPI stakeholder reporting.
- Applied LCA/LCCA methodologies to a World Bank-linked hydroelectric project in Indonesia.

Data Analyst · **Hood Group** · Southend-on-Sea, UK

May 2022 – Dec 2023

- Designed and delivered **Tableau dashboards and infographics** for leadership and presented analytical findings in.
- Executed **100+ SQL queries** and analysed data for business.

Data Analyst Intern · **Sansys Technologies** · London, UK

Dec 2021 – May 2022

- Built ML models and ETL pipelines (SQL/Python); created **Tableau and Power BI dashboards**; translated business requirements into technical specifications for client engagements.

Sales Consultant · **Renault India Pvt. Ltd** · Bengaluru

Sep 2019 – Sep 2020

- Top performer across all Trident showrooms within 3 months; analysed **customer purchase patterns and conversion data** to develop sales forecasts and improve targeting.

SELECTED TECHNICAL PROJECTS

- **InterviewAI — Enterprise AI Bench-to-Billable Platform**
 - Designed an AI-powered enterprise platform to improve consultant interview readiness through personalized coaching, JD matching, adaptive mock interviews, and multi-agent AI workflows.
 - Defined the product vision, business case, system architecture, KPIs, automation strategy, and roadmap, while building candidate, manager, and admin experiences end-to-end.

- [ServiGo](#) — AI-Enabled Doorstep Car Servicing Platform
 - Built a full-stack product prototype covering customer, partner, and admin portals, demonstrating end-to-end product thinking from market sizing and unit economics to deployment.
 - Defined product strategy, user journeys, pricing model, AI roadmap, and key product decisions to improve customer trust, retention, and operational efficiency.

[ClaimCraft AI](#) — Human-in-the-Loop AI Workspace

- Designed an AI-assisted patent claim refinement platform focused on explainability, grounded evidence, human review, and version-controlled workflows for high-trust AI applications.
- Built document parsing, retrieval, AI-assisted reasoning, review workflows, and export capabilities while applying product principles around trust, recoverability, and AI governance.

60+ projects on GitHub — from ML prototypes to production-grade AI pipelines.

TOOLS, METHODS & STACK

AI / GenAI:	LangChain · LangGraph · LangSmith · CrewAI · OpenAI · Groq · Ollama · RAG · FAISS · ChromaDB · n8n · Autogen
Product Mgmt:	Jira · Linear · Asana · Notion · Trello · Monday.com · GitHub Issues · Miro · FigJam · Mural
Design / UX:	Figma (create + review) · Miro · Whimsical · Mermaid · AI-generated screens · Hand-sketched wireframes
Analytics:	Google Analytics · Mixpanel · Amplitude · Hotjar · Shopify Analytics · Tableau · Power BI · SQL dashboards
Data & ML:	Python (Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow) · SQL (PostgreSQL, MySQL) · PySpark · MLflow
Delivery:	Scrum · Kanban · Sprint Planning · Backlog Grooming · Standups · Sprint Reviews · Retrospectives · A/B Testing
Docs Produced:	PRDs · BRDs · Tech Req. Docs · User Flows · System Architecture · API Specs · Investor Decks · OKR Reports
Platforms:	AWS (EC2/ECS) · GCP · Docker · Airflow · Kubernetes · FastAPI · Shopify · Razorpay · WordPress

EDUCATION

M.Sc. Data Science — Coventry University, United Kingdom

2021 – 2022

B.E. Mechanical Engineering — Visvesvaraya Technological University, India

CERTIFICATIONS

- GenAI with LangChain & HuggingFace — Udemy (55 hrs)
- End-to-End MLOps Bootcamp — Udemy (55 hrs)
- Harvard CS50 – HTML JS Basic
- Data Science Masters Pro — iNeuron (155 hrs)
- Agentic AI & GenAI on AWS/GCP
- Python FastAPI Development
- SQL Data Analyst & Data Engineer — DataCamp
- IELTS Band 7
