

The 3 AM Production Incident

Why 90% of AI Agents are
just glorified chatbots waiting
for human prompts.

SLIDE 1

Chatbot vs Event-Driven Agent

Reactive AI:

Human →

Prompt →

Wait →

Copy-Paste

Event-Driven Agent:

System Event →

Isolated Sandbox

→ Auto-Test →

→ Approval Gate

3 Golden Rules for AI Product Managers

**1. Trigger
on system
events, not
human
prompts.**

**2. Isolate
execution in
automated
sandboxes.**

**3. Put
humans at
the approval
gate, not
the typing
wheel.**
